model 8300-8309
MSR Emergency Shower and Eye/Face Wash

FEATURES & BENEFITS

CONSTRUCTION

32mm Stainless Steel pipework and fittings along with powder-coated cast-iron 22.9 cm (9") diameter floor flange and 27.9 cm (11") stainless steel bowl provide an additional corrosion resistance in a highly durable product.

QUALITY CONTROL

The Eye/face wash and valve assembly are pre-built and fully water pressure tested to ensure no leaks and proper function which ultimately reduces installation time.

VALVES

Eyewash and shower ball valves are designed to make the flushing of contaminants occur with the simple pull of a lever or push of a stainless steel flag. Both valves come equipped with stainless steel ball and stem to provide greater protection against corrosion and breakage.

STRAINERS/FILTERS

Chrome-plated brass in-line 50 x 50 mesh water strainer prevents debris from reaching the eyewash so the unit stays functioning at its best. Strainer is easily serviceable.

SHOWER HEAD

AXION[®] MSR ABS plastic drench showerhead uses a hydrodynamic design to give equal distribution of water throughout the entire footprint of flow.

EYE/FACE WASH

AXION[®] MSR eye/face wash head (patent pending) uses an inverted directional laminar flow to sweep contaminants away from the vulnerable nasal cavity.
