

The Itron logo is located in the top left corner. It consists of the word "Itron" in a white, sans-serif font, with a small yellow lightning bolt icon above the letter 'o'. The logo is set against a red rectangular background.

Itron

The background of the entire page is a nighttime photograph of a city skyline. Two prominent skyscrapers are visible. The one on the left is a tall, slender tower with a distinctive top section, illuminated with blue and white lights. The one on the right is a wider, more modern skyscraper with a glass facade, also illuminated with blue and white lights. The sky is dark blue, and the foreground shows a blurred road with light trails from traffic, suggesting a long exposure. Streetlights and some lower-level buildings are also visible.

Itron Sub-Metering

Queensland Urban Utilities

All Inclusive Fixed Price Quote

With Itron, your only responsibility is to install the meters. We are your end to end solution for high rise sub-metering systems, with our fixed price quoting including everything from the meters to solution implementation and data handling. Itron take full responsibility for the automatic data supply to Queensland Urban Utilities for five years, with no need for meter data panels when using the Itron system.

Our aim is to make the process as simple as possible by allowing you to focus on the meter installation only, let Itron take care of the rest.

Our fixed price quoting is based on the known capabilities of our EverBlu technology. With accurate site information, we can provide a fixed price quote without the need for any site surveys or visits. Fixed price quoting eliminates any risk to your budget.

We have currently implemented over 300 AMR sub-meter networks in high rise developments across Australia. Every project was delivered on time, on budget and on quality.

ITRON MAKE IT SIMPLE TO MEET YOUR SUB-METERING REQUIREMENTS.

IPAM List

Itron are an approved supplier of AMR for sub-metering.

Wireless System

The Itron fixed network solution requires access to a single 10A GPO generally in a comms cupboard, with no additional wiring required, including for the meters. The wireless technology means the development does not need any further electrical planning or work, or undergo any additional fire certification approvals.

Sub-Assembly Kits

Itron fixed price quotes includes the 20mm meter sub-assembly kits. The sub-assembly kit allows ease of meter installation to accommodate most meters. Robust brackets ensures a strong, rigid installation, and minimal water spillage on meter exchange.

The sub-assembly kits can be supplied and installed prior to the supply of meters.

Hear From Our Customers

“We had a terrific experience with Itron. The lead-up and install was done with no fuss, Itron asked for a green light to install, once we gave it the project was completed within two weeks. Very refreshing and extremely professional, you made light of the process which is totally new to builders and developers in NSW.”

Wahid, JSN Hanna Pty Ltd

EVERBLU NETWORK ARCHITECTURE

Meters & EverBlu Cybles

TD8 is a piston type meter with extra dry register for residential, commercial and industrial applications for potable water quality. Pre-equipped for communication with the EverBlu Cyble Enhanced.

TD8 Technology

The TD8 combines the advantages of piston type technology together with proven reliability of the extra dry register. No gears in contact with water, and the smooth piston chamber ensures long term accuracy. The irreversible meter cap mounting makes it totally tamper proof without the use of lead seals.

Data is created by meters pre-equipped with integrated radio modules.

Standard Compliance

- » NMI R49-1 class 2 in all positions
- » AS 3565.1

EverBlu Collectors

receive data transmitted daily by the surrounding meters.

This data is stored and transferred daily to an EverBlu Access Point either directly or by using other collectors as relays.

EverBlu Access Point

collects meter data, then stores and transmits the data to the utilities FTP server at a preset time (typically on a daily basis) using GPRS communication.

QUU Billing System

About Itron

Itron is the largest Global provider of water metering solutions, and in Australia we are the largest single provider of smart water metering technologies. With over 90 million water meters and more than 21 million water communication modules supplied worldwide, Itron is your best choice in resource management. Itron designs, manufactures, supplies, installs and maintains all of its own technology and is solely responsible. We have a manufacturing base in Australia and supply all of the major Australian Water Utilities with TD8 DN20 (20mm) meter fitted with EverBlu Cybles, including Queensland Urban Utilities, where we are the largest DN20 supplier. We have a dedicated team of technicians on site commissioning Itron Technology.

Smart Metering Solutions

Itron metering systems provide a number of functions, primarily to provide automated meter readings from individual unit meters that have been installed in Multi-Level Buildings to individually bill each customer for their water usage.
